

**HOLO
BUILDER**
A FARO® Technologies Company

Enterprise-Level Insight, Project-Level Control

The fastest and most reliable Construction Progress Management platform, powered by 360° photo capture. Built for General Contractors, Engineering Firms, and Owners.

Construction Progress Management for Your Jobsite

HoloBuilder™ is a Construction Progress Management platform for General and Specialty Contractors, Owners, Architects, Engineering Firms, and Construction Management Firms to document and communicate construction site progress in 360°. It enables field teams to capture projects with 360° cameras frequently and allows other key stakeholders to gain remote site access in 360° from anywhere to manage progress remotely without the need to travel to the jobsite. The easy and straightforward workflow generates a solid digital progress record of their jobsites that is securely accessible at all times.

HoloBuilder provides a complete record of construction activities—eliminating doubt when tracking progress remotely.

Reduce travel time and cost by granting stakeholders remote site access.

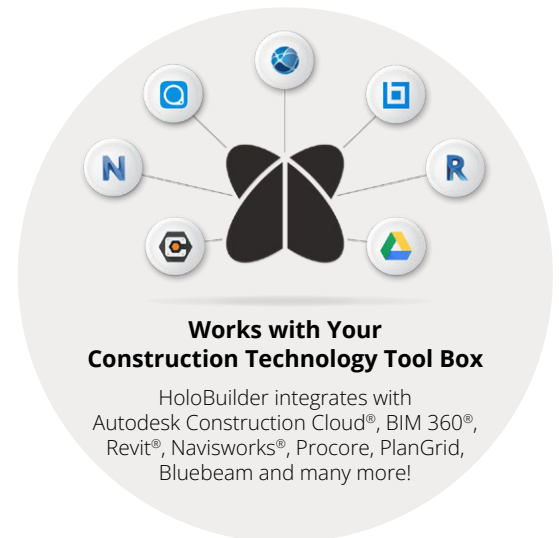

Reduce legal risk with a solid progress and as-built record for claims and dispute resolution.

Improve QA/QC processes by giving your project team the understanding of the job site that they need to resolve issues, change orders, and RFIs fast and easy.

Differentiate your services with interactive OAC (Owner, Architect, Contractor) meetings by allowing all stakeholders to virtually walk the jobsite and a next-generation hand over deliverable.

About HoloBuilder

HoloBuilder is being provided by **HoloBuilder, Inc., a FARO® Technologies company**. It is headquartered in the United States with an R&D center in Germany and a global virtual team. **28,000 Construction projects** are documented in HoloBuilder by customers from over 35 countries. **59% of the ENR Top 100** contractors trust HoloBuilder, including these leading companies:

Works with Your Construction Technology Tool Box

HoloBuilder Key Features Spotlight

These features make HoloBuilder the most insightful solution for Construction Progress Management, powered by 360° photo capture.

Centralized Project Information

Easily manage all of your projects **from your HoloBuilder Enterprise Dashboard**, your central point of access within your company or region. Drill down into any project or team and observe project progress on the highest level.

A Whole New Way to Capture Progress

HoloBuilder **SpeedMode** and **ContinuousMode** let you capture exactly what you need with unparalleled speed and accuracy. Our technology creates structured progress updates by tracking where you walk and capturing meaningful locations.

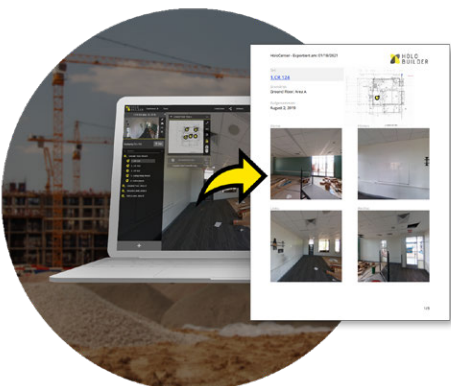

Easiest Way to Capture Outdoor Projects

GPS Enabled Floor Plans help you to capture linear outdoor projects. Geo-reference any floor plan and unlock a faster, easier, and more precise capture experience for your teams in the field. You can be confident that your photos are taken in the exact right location, based on GPS data.

Compare Progress With BIM Models

Compare progress with existing conditions side-by-side for better design coordination and quality control. Bring your BIM model renderings into the field with the powerful **HoloBuilder Add-Ins for Autodesk Revit® and Navisworks®**.

Powerful Reports For Stakeholders

Create impressive handover packages with structured, branded and **professional PDF Reports**. Archive and download your digital progress record as an offline version to view it anytime with the **Offline HoloViewer!**
